

# SUMMARY REPORT

Work Order: 7

Client: Aspen Clinical

## BiochemicalPharmacology

- Test 1 ..... Successful
- Test 2 ..... Successful
- Test 3 ..... Failed
- Test 4 (Additional) ..... Successful

## ProfilingScreen

- Test 1 ..... Successful
- Test 2 ..... Successful

### Notes By the Technical Director:

The tests results showed that the compound was active when combined with chemical A. This correlation can be dangerous if the compound were to be ingested under stress or extremely cold temperatures. This compound should only be used for topical applications. If mixed with compound B however, the reaction would be suitable for use by consumption.
